The Planets that doe gouerne in this Eclipse, are Mercury and Iupiter, the one placed in the first house, which is of sickness, seruants & small beastes, &c. It likewise sheweth that discorcion and ill will shall happen among friends, and one shall goe about to supplant and ouerthrowe another, and study their hurt: yea it sheweth there shall be little trust among men, neither shall things fall out as they intend, or as they hoped for, great waite of wealth and losse of substance among the mighty and greater sort, soldiers and warriors shall not greatly prosper, and many vnfaithfull: great hindrance of husbandry by vnseasonable weather: also sundry infirmities of the eares, throate and necke, with reumes, Coughes, and such like colde and reumaticke diseases: other sorowes & hindrances are like to happen to those countries and Citties as are subiect to the signe Gemini, and the third Quadrangle, as are Hircania, Armenia Maritima, in the north Aegyptus, Sardinia, Brabantia, Ducatus Wirtemberg, Flandria Longobardia, Grecia, Croatia, Corinthia, pars Reni, Silesia inferior, Arabia, felix Hispania, Dalinatia, Sclauonia, Vngaria, Moravia, Misra, Portugalia, Normandia, Corduba, Versellas, Louanium, Brugae, Moguntia, Hassford, Bamberg, Norinberg, Colonia agrip, Buda, Chalcouia, Toletum, Narbona, Auinio, Hierosolima, Corinthum, Rhodum, Papia, Tholosa, Lugdunum, Lutetia Parisiorum, Batileam, Heidelberg, Hispalis, Compostella, Rathomagum, Ratispona &c.

The effects therof, shall begin the xxi. day of July this yeare 1602. & so increase by litle & litle till the xxvii. of Sept. 1603. & then it shall rage & utter his greatest forces, being the middle trient, wherein shall be scene & felt his most bitter effects, & dureth till the iiii. of Decemb. 1604. & then by degrees decrease till the end of the third trient, which shall be the x. of Feby. 1606. This Eclipse preiudiceth much vnseasonable weather, extreme colde, frost and snow, stormes & tempests, dark, cloudy & pestilent ayre, strange & vnwonted tides, hard & perilous traouelling by Sea, shipwackes, spoile & scarcety of fish. A description of the inclination & disposition of this years reuolution as followeth.

This years reuolution taketh his beginning, at what time the Sunne entrench into the first min. of γ . which shall be this present year of our Lord 1602. The 11 day of March, at 7. in the morning, at what time the 20. deg. of δ . doth ascend. β . being retrograde & pigrine in the 7. house. γ . likewise retrograde in ϵ . in the 6. house. δ . also retrograde in γ . in the 5. house. The Sunne & ζ . in the 12. house in γ . & the Moone in δ . in the 11. house. The full Moone going before & the deg. preferred the 16. deg. of γ . euen upon the cuspe of the 6. house, &c. The Planets that rule in this reuolution, are ζ . & δ . All which well considered & wayed, shew but a meane estate of this yeare following: many that were friends shal become enemies, yea such as before had bin louers and great friends, shal be at much strife, & discension: child:en shal be a grieft to their parents, hard trauell & great dannger to women in child-birth, great discension about the goods of the dead, much payne and grieft of the eyes, many shall be grieued with Apostumes, vniolosity, griefes of the belly, Stomacke and secret parts, and such like comagion, with death of the meane & poorer sort, and such as eate the bread of sorrow: disagreement among married folkes, incontinencie and loose life, fornication, vnlawfull loue, and other vicious liuing. And because the effects of the Eclipse of the Sunne which was in Canc. in June 1600. yet endureth: the inclination of this yeare will not greatly differ from the effects thereof: whereunto I referre the gentle Reader, & therewith to consider the Inuolution of Eclipses concurring, which cannot but shew great variety, or alteration: wherfore it shall be meete for all men, to pray to God to holde his holy hand ouer vs, & to saue & keep our most gracious Queene, in health & prosperity, and defend her Realme in peace and tranquillity.
